Ideal Partner:

Ideal Partner: The ideal partner for the GetGeoSocial Marketing System is a real estate team, professional or agency looking to enhance their listing attraction efforts. This includes:

- **Real Estate Mega Team:** Seeking to dominate specific neighborhoods and secure more listings.
- **Real Estate Mega Agents:** Looking advanced marketing tools to increase overall performance.
- **Boutique Brokerage Firms:** Aiming to differentiate from the big box brokers with high-value gear for agents.

REALTOR Profile:

- Typically, a top 5 ranked listing agent in their market.
- Active on social media platforms.
- Interested in leveraging technology to improve business outcomes.
- Looking for exclusive marketing opportunities to stand out from competitors.

Key Benefits:

Customer Experience and Results:

- **Precision Targeting:** Engage homeowners with unparalleled accuracy.
- **Cost Efficiency:** Pinpoint accurate targeting enhances reach, cuts costs and eliminates waste.
- **High ROI:** Trust building model to educate and bring value accelerates organic listing share momentum.
- **Competitive Edge:** Exclusive zip code access drives competitive advantage by keeping competitors out.
- **Comprehensive Engagement:** Managed content and campaign systems, keeps you top of mind.
- **Instant Execution:** Ready-to-use system with no need for additional staff training.
- **Imminent Success:** Tech built by listing masters for listings masters... does it get better than that? .

Pain & Gain:

The Pain: Recently, the government forced Facebook and other platforms to eliminate geofencing and demographic targeting for all housing related advertising by introducing a “Special Housing Category”, that almost instantly delivered a crushing blow to the Real Estate industry, especially Listing Agents.

No longer could a realtor create a geofence around a farm, or target the owners in zip code, instead; REALTORS are now forced to advertise in a 30-mile circle, with zero demographic filters. An outcome proven to be inefficient and costly.

The Gain: With GeoSocial Audience Optimization, REALTORS now have the flexibility to target as few as 300 owners in a neighborhood via Facebook and Instagram. We bring back what Facebook took away, except BETTER!

A GeoFence ad only reaches people inside the fence and MISSES a KEY demographic in absentee owners, aka the multi deal investor clients who live outside the “Fence”. With a GeoSocial Audience, your ads reach owners anywhere on the globe. A breakthrough that unlocks a door every leading REALTOR should want a key to... especially listing focused ones.
